

**The amount you practice...**

**...impacts how well you perform.**

**In baseball *and* business, only through practice can you consistently hit home runs.**

The best baseball players practice before, during, and between their games. Using a batting cage increases repetitions, compresses time, and reduces the cost of failure.

How much practice time do your Lean Six Sigma students get before they face live pitching? Do you provide them with a risk-free practice space?

***Practice shouldn't be a luxury! It should be required!***

**Practice-based e-Learning from MoreSteam.com gives you the reps you need to complete every project.**

#### Online Training That Delivers Experience

MoreSteam offers a full range of online Lean Six Sigma training. Our classes feature interactive exercises, quizzes, and simulations that require students to spend about 50% of their time in practice. Students apply tools while they learn them and repeat any lesson as needed.

#### Simulations for Your Classroom Practice

For the classroom, MoreSteam offers its SigmaSim® suite of DMAIC and Lean simulations and games to provide activity-based instruction in support of Blended Learning initiatives. These online multi-player games offer students a **rich, risk-free Lean Six Sigma project experience!**

Over 150,000 process improvement students have used MoreSteam's online courses. *Now you know why.*
