

Instructor-led Training

Advanced Blended Learning

Which Engine Drives Your Training?

Technology has changed. So should your Training.

Top Lean Six Sigma deployments take advantage of *Advanced Blended Learning*, a training model that combines the best of online technologies and classroom teaching methods to deliver capability. Advanced blended models emphasize practice, coaching, affordability and accountability.

Since 2000, over 1,800 organizations and 45% of the Fortune 500 have relied on MoreSteam's training technology and service to make the most of their training investment.

We wrote the book on *Advanced Blended Learning*. Contact MoreSteam.com today for:
